DETAILED ACTION

Claim Rejections - 35 USC § 102

(The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5, and 7-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by AAPA as explained in paper no. 4. Applicant argues that AAPA teaches molding around an already charged tube. However, Applicants claims do not specify any order to his steps and therefore the claims are read as the tube being charged and sealed before molding .

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-14 rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in view of Breault et al as set forth in paper no. 4.

Applicant argues that Breault et al disclose charging the system only after the entire system is assembled. However, Breault is used to teach charging after the parts are put together and this is taught. Applicant further argues that the composition in

Breault et al cannot be injection molded. However, Breault et al is not used to teach the injection molding.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
